Abciximab injection
MEDICATION GUIDE

NOTE: This sheet is a summary. It may not cover all possible information. If you have questions about this medicine talk to your doctor, pharmacist, or health care provider.

What is this medicine?

ABCIXIMAB (ab SIX i mab) prevents blood clots during episodes of chest pain or a heart attack. It may be used during heart surgery.

This medicine may be used for other purposes; ask your health care provider or pharmacist if you have questions.

How should I use this medicine?

The medicine is for injection or infusion into a vein. It is given by a health care professional in a hospital or clinic setting.

Talk to your pediatrician regarding the use of this medicine in children. Special care may be needed.

Overdosage: If you think you have taken too much of this medicine contact a poison control center or emergency room at once.

NOTE: This medicine is only for you. Do not share this medicine with others.

What if I miss a dose?

This does not apply.

What should I tell my health care provider before I take this medicine?

They need to know if you have any of these conditions:

- Bleeding problems or blood disorders
- Brain tumor or aneurysm
- High blood pressure
- Previous stroke
- Recent injury or surgery
- Took a drug to prevent blood clots like warfarin in the past week
- Vasculitis
- An unusual or allergic reaction to abciximab, mouse or human proteins, other medicines, foods, dyes, or preservatives
- Pregnant or trying to get pregnant
- Breast-feeding

What may interact with this medicine?

- Aspirin and aspirin-like drugs
- Clopidogrel
- Dipyridamole
- Herbal products containing feverfew, garlic, ginger, ginkgo, or horse chestnut
- Medicines that break up blood clots like alteplase, reteplase, streptokinase, and urokinase
- Medicines that treat or prevent blood clots like warfarin, enoxaparin, dalteparin, tinzaparin, argatroban, bivalirudin, and lepirudin
- NSAIDs, medicines for pain and inflammation, like ibuprofen or naproxen
- Ticlopidine

This list may not describe all possible interactions. Give your health care provider a list of all the medicines, herbs, non-prescription drugs, or dietary supplements you use. Also tell them if you smoke, drink alcohol, or use illegal drugs. Some items may interact with your medicine.

What side effects may I notice from receiving this medicine?

Side effects that you should report to your doctor or health care professional as soon as possible:

- Allergic reactions like skin rash, itching or hives, swelling of the face, lips, or tongue
- Breathing problems
- Chest pain
- Unusual bleeding or bruising

Side effects that usually do not require medical attention (report to your doctor or health care professional if they continue or are bothersome):

- Back pain
• Dizziness
• Headache
• Nausea
• Stomach pain

This list may not describe all possible side effects. Call your doctor for medical advice about side effects. You may report side effects to FDA at 1-800-FDA-1088.

**What should I watch for while using this medicine?**

Your condition will be monitored carefully while you are receiving this medicine.

**Where should I keep my medicine?**

This drug is given in a hospital or clinic and will not be stored at home.

*NOTE: This sheet is a summary. It may not cover all possible information. If you have questions about this medicine, talk to your doctor, pharmacist, or health care provider.*
