Colchicine injection
MEDICATION GUIDE

NOTE: This sheet is a summary. It may not cover all possible information. If you have questions about this medicine talk to your doctor, pharmacist, or health care provider.

What is this medicine?
COLCHICINE (KOL chi seen) is for joint pain and swelling due to attacks of acute gouty arthritis.

This medicine may be used for other purposes; ask your health care provider or pharmacist if you have questions.

How should I use this medicine?
This medicine is for injection into a vein. It is given by a health care professional in a hospital or clinic setting.

Talk to your pediatrician regarding the use of this medicine in children. Special care may be needed.

Overdosage: If you think you have taken too much of this medicine contact a poison control center or emergency room at once.

NOTE: This medicine is only for you. Do not share this medicine with others.

What if I miss a dose?
This does not apply.

What may interact with this medicine?
• Alcohol
• Certain medicines for cholesterol like atorvastatin
• Certain medicines for coughs and colds
• Certain medicines to help you breathe better
• Cyclosporine
• Digoxin
• Epinephrine
• Grapefruit or grapefruit juice
• Methenamine
