**Dimethyl Sulfoxide, DMSO bladder irrigation**

**MEDICATION GUIDE**

NOTE: This sheet is a summary. It may not cover all possible information. If you have questions about this medicine talk to your doctor, pharmacist, or health care provider.

### What is this medicine?

DIMETHYL SULFOXIDE (dye meth il suhl FOK sahyd) is a solution for your bladder. It is used to treat the bladder pain or discomfort caused by interstitial cystitis.

This medicine may be used for other purposes; ask your health care provider or pharmacist if you have questions.

### How should I use this medicine?

This medicine is given by a catheter or syringe infusion into the bladder. It is given by a health care professional in a hospital or clinic setting. Try to hold this medicine in your bladder for 15 minutes after treatment.

Talk to your pediatrician regarding the use of this medicine in children. Special care may be needed.

Overdosage: If you think you’ve taken too much of this medicine contact a poison control center or emergency room at once.

Overdosage: If you think you have taken too much of this medicine contact a poison control center or emergency room at once.

NOTE: This medicine is only for you. Do not share this medicine with others.

### What if I miss a dose?

Keep appointments for follow-up doses as directed. It is important not to miss your dose. Call your doctor or health care provider if you are unable to keep an appointment.

### What should I tell my health care provider before I take this medicine?

They need to know if you have any of these conditions:

- Bladder cancer
- Cataracts
- An unusual or allergic reaction to Dimethyl Sulfoxide, other medicines, foods, dyes, or preservatives.
- Pregnant or trying to get pregnant
- Breast-feeding

### What may interact with this medicine?

Interactions are not expected.

This list may not describe all possible interactions. Give your health care provider a list of all the medicines, herbs, non-prescription drugs, or dietary supplements you use. Also tell them if you smoke, drink alcohol, or use illegal drugs. Some items may interact with your medicine.

### What side effects may I notice from receiving this medicine?

Side effects that you should report to your doctor or health care professional as soon as possible:

- Allergic reactions like skin rash, itching or hives, swelling of the face, lips, or tongue

Side effects that usually do not require medical attention (Report these to your doctor or health care professional if they continue or are bothersome.):

- Changes in taste
- Pain when urinating

This list may not describe all possible side effects. Call your doctor for medical advice about side effects. You may report side effects to FDA at 1-800-FDA-1088.

### What should I watch for while using this medicine?

Tell your doctor or healthcare professional if your symptoms do not start to get better or if they get worse. Your condition will be monitored carefully while you are receiving this medicine. Your vision and blood may be tested before and during use of this medicine.
Where should I keep my medicine?

This drug is given in a hospital or clinic and will not be stored at home.

NOTE: This sheet is a summary. It may not cover all possible information. If you have questions about this medicine, talk to your doctor, pharmacist, or health care provider.
