Isoniazid, INH injection
MEDICATION GUIDE

NOTE: This sheet is a summary. It may not cover all possible information. If you have questions about this medicine talk to your doctor, pharmacist, or health care provider.

What is this medicine?
ISONIAZID (eye soe NYE a zid) is used to prevent or to treat tuberculosis (TB).

This medicine may be used for other purposes; ask your health care provider or pharmacist if you have questions.

How should I use this medicine?
This medicine is for injection into a muscle. It is usually given by a health care professional in a hospital or clinic setting. If you get this medicine at home, you will be taught how to prepare and give this medicine. Use exactly as directed. Take your medicine at regular intervals. Do not take it more often than directed. Take all of your medicine as directed even if you think you are better. Do not skip doses or stop your medicine early. Skipping doses may make the TB resistant to this medicine and other medicines. Do not stop taking except on your doctor's advice.

It is important that you put your used needles and syringes in a special sharps container. Do not put them in a trash can. If you do not have a sharps container, call your pharmacist or healthcare provider to get one.

Talk to your pediatrician regarding the use of this medicine in children. Special care may be needed.

Overdosage: If you think you have taken too much of this medicine contact a poison control center or emergency room at once.

NOTE: This medicine is only for you. Do not share this medicine with others.

What if I miss a dose?
If you miss a dose, use it as soon as you can. If it is almost time for your next dose, use only that dose. Do not use double or extra doses.

What should I tell my health care provider before I take this medicine?

They need to know if you have any of these conditions:
- Diabetes
- HIV positive
- If you frequently drink alcohol-containing beverages
- Kidney disease
- Liver disease
- Malnutrition
- Tingling of the fingers or toes, or other nerve disorder
- An unusual or allergic reaction to isoniazid, other medicines, foods, dyes or preservatives
- Pregnant or trying to get pregnant
- Breast-feeding

What may interact with this medicine?

Do not take this medicine with any of the following medications:
- Entacapone
- Green tea
- Levodopa
- MAOIs like Carbex, Eldepryl, Marplan, Nardil, and Parnate
- Procarbazine
- Ranolazine
- Tolcapone

This medicine may also interact with the following medications:
- Acetaminophen
- Alcohol
- Antacids
- Medicines for diabetes
- Medicines for fungal infections like ketoconazole and itraconazole
- Medicines for seizures like carbamazepine, phenobarbital, phenytoin, valproic acid
- Theophylline
- Zalcitabine

This list may not describe all possible interactions. Give your health care provider a list of all the medicines, herbs, non-prescription drugs, or dietary supplements you use. Also tell
them if you smoke, drink alcohol, or use illegal drugs. Some items may interact with your medicine.

**What side effects may I notice from receiving this medicine?**

This list may not describe all possible side effects. Call your doctor for medical advice about side effects. You may report side effects to FDA at 1-800-FDA-1088.

**Where should I keep my medicine?**

Keep out of the reach of children.

If you are using this medicine at home, you will be instructed on how to store this medicine. Throw away any unused medicine after the expiration date on the label.

NOTE: This sheet is a summary. It may not cover all possible information. If you have questions about this medicine, talk to your doctor, pharmacist, or health care provider.

**What should I watch for while using this medicine?**

Visit your doctor or health care professional for regular check-ups. You will need blood work done regularly.

You may need to take vitamin supplements while on this medicine. Talk to your doctor about the foods you eat and the vitamins you take.

Alcohol may interfere with the effect of this medicine. Avoid alcoholic drinks.

If you are diabetic check your blood sugar as directed. Also, you may get a false-positive result for sugar in your urine. Talk with your doctor.
